Prediction Report

Stage: Round of 32

Run date: 2026-06-27 (report created: 2026-06-26)

Headline	Value
Title pick	France (15.8%)
Most likely finalists	France & Spain
Golden Boot pick	Lionel Messi (Argentina) – proj 7.3
Teams simulated	32
Monte Carlo runs	10,000

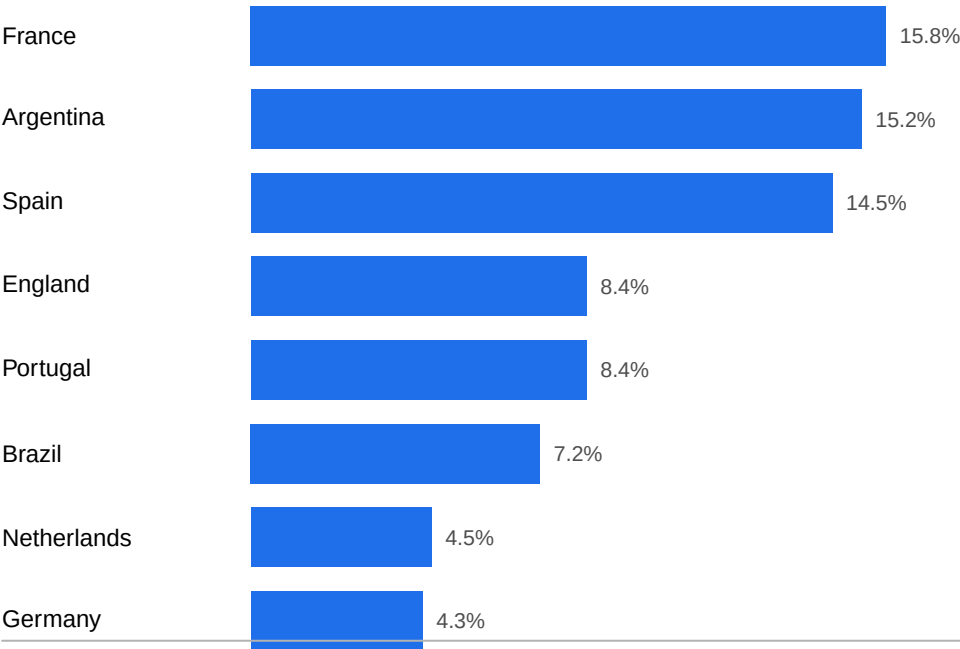

Model: ridge-shrunk Poisson (Dixon-Coles) goal model + Monte Carlo bracket simulation

Title-winning probability

Round of 32 – Match Predictions

Advancer = win the tie; Score = EV-optimal Scorito pick (max expected points)

Match	Tie	Advance	90'	Score	E[pts]
Mexico v Canada *	Projected	Mexico (54%)	Home win	2–1 (9%)	28
Germany v Scotland *	Projected	Germany (72%)	Home win	1–0 (10%)	36
Netherlands v Morocco *	Projected	Netherlands (62%)	Home win	2–1 (9%)	31
Brazil v Japan *	Projected	Brazil (70%)	Home win	1–0 (10%)	36
England v Cape Verde *	Projected	England (81%)	Home win	2–0 (12%)	43
Belgium v Ghana *	Projected	Belgium (67%)	Home win	1–0 (10%)	34
USA v DR Congo *	Projected	USA (70%)	Home win	2–1 (10%)	36
Spain v Austria *	Projected	Spain (79%)	Home win	2–0 (11%)	42
Switzerland v Algeria *	Projected	Switzerland (59%)	Home win	2–1 (9%)	29
Portugal v Saudi Arabia *	Projected	Portugal (82%)	Home win	2–0 (12%)	44
Australia v Egypt *	Projected	Egypt (52%)	Away win	1–2 (8%)	25
Argentina v Uruguay *	Projected	Argentina (71%)	Home win	1–0 (10%)	36
France v Norway *	Projected	France (74%)	Home win	2–0 (10%)	38
Korea Republic v Ecuador *	Projected	Ecuador (52%)	Away win	1–2 (8%)	25
Colombia v Senegal *	Projected	Colombia (55%)	Home win	2–1 (9%)	27
Croatia v Cote d'Ivoire *	Projected	Croatia (66%)	Home win	1–0 (10%)	33

Recommendations & Method

How to play these predictions

STRATEGY: Submit the EV-optimal score per tie (max expected Scorito points), not the bare most-likely score -- the toto term dominates, so never pick a draw when a win is favoured. For top scorers, pick by Scorito value (goals x position x stage: a defender/keeper goal pays 4x a forward's), not raw goals -- e.g. Scorito favours Kylian Mbappe over Golden-Boot lead Lionel Messi. Model's title pick: France (15.8%, worth 250 bonus pts).

Champion pick: France (15.8%). Safe R16 backers: Portugal, England, Spain, France, Germany, Argentina.

Methodology

1. Team strength starts from Elo priors adjusted by researched form/injury notes.
2. A Dixon-Coles bivariate Poisson model turns strength into scoreline distributions; parameters are refined by a ridge-penalised fit on observed results (shrinking to priors).
3. A Monte Carlo simulation plays out the bracket many times -> progression probabilities, with extra time and strength-tilted penalty shootouts for knockout ties.
4. Each team's expected goals are shared among its players (form-adjusted) and weighted by how far the team is projected to advance -> per-stage and Golden Boot scorer forecasts.

Data provenance

Verified: group draw, reported group winners, R32 anchor ties, Golden Boot tallies.

Illustrative/projected: unplayed scores and not-yet-confirmed bracket slots.
